

Software Defined Data Center

EMC ViPR

Manage Everything with Software-Defined Storage Solutions

Today's cloud, web, social and mobile applications are driving data growth at an unprecedented rate around the world and many modern IT infrastructures simply cannot scale at this astonishing pace. This 3rd platform IT evolution provides new IT architectures to meet the needs of speed, scale, agility and growth. But with close to six million infrastructure arrays installed each year to keep up with data growth, enterprises simply can't afford to rip and replace to pursue new IT strategies.

EMC ViPR Software-Defined Storage provides the solution to this common industry problem. ViPR enables businesses to leverage their existing storage investments to manage new applications and data, providing a clear path to the 3rd platform.

SIMPLIFY AND AUTOMATE MANAGEMENT

Reduces time to provision by 63%

EXTEND ARCHITECTURE

The only extensible software-defined storage architecture

OPEN PLATFORM

Create an accessible unified platform

Win the Control Point with ViPR today! ViPR simplifies and automates storage provisioning and management tasks by virtue of a central control point.

SOFTWARE-ONLY SOLUTIONS THAT TRANSFORM STORAGE INTO A SIMPLE, EXTENSIBLE AND OPEN PLATFORM

ViPR provides a centralized way to automate provisioning and deliver storage resources across multi-vendor storage arrays. With EMC ViPR, organizations are no longer bound by physical limitations. Businesses can transform their existing infrastructure into a simple software defined platform that can deliver fully automated storage and services to users and applications.

COMPANIES THAT EMBRACE NEXT-GENERATION TECHNOLOGY WILL BE MARKET LEADERS

- ViPR offers unmatched choice and flexibility so you can efficiently operate at cloud scale.
- Works with products: VMAX, VNX, VPLEX, Isilon, RecoverPoint, ViPR SRM
- Integrates with third-party storage: Dell, Hitachi Data Systems (HDS), HP, IBM, NetApp, Oracle and SolidFire
- Integrates with cloud stacks: OpenStack, VMware, Microsoft
